

# 13th European Neuro-Ophthalmological Society Conference (EUNOS2017)

Budapest, Hungary, on 10-13 September 2017.

Please, let me allow to kindly draw your attention our next Congress.

The meeting aims to enhance exchange of cutting edge scientific information amongst clinicians, visual and neuroscientists, in order to improve the care of patients afflicted by neuro-ophthalmic disorders.

The scientific program will cover the latest information in the field of visual and neuroscience relevant to the clinical practice of neuro-ophthalmology, including but not limited to genetics, ophthalmic and neuroimaging tools, electrophysiology, visual field and eye movement abnormalities. New this year is the addition of a pre meeting Research Day focused on optic nerve disorders. Some of the latest technical advances in ophthalmology and neurology will be on display at the exhibition of the conference.

Therefore, this conference offers the ideal venue to present your work, and share it with clinicians caring for patients with visual and neurological diseases!

The conference will take place in the heart of Budapest along the banks of the river Danube in the serene environment of Danubius Health Spa Resort.

The registration includes an exciting social and cultural program, as well.

We look forward to seeing you there.

Gabriella Szatmary MD, PhD

Chair of EUNOS 2017

On behalf of EUNOS,

Hungarian Ophthalmology Society and Hungarian Neurological Society
